

1983 Car For Sale

Posted by yellowcar - 05 Dec 2016 10:32

Hey Everyone;

I am selling my '83 and would like to see it go to the racing community. Car is a decent runner with a couple of track days this year at Thunderhill Raceway in Northern California. Engine compression is good with no oil leaks or smoke. Body is good with nice glass all around. I resurrected the car from a salvage yard to bring back to life for some fun. Moving on now to the next project and this one must go to free up space.

Installed new fuel pump, fuel filter, DME, water pump, cooling fans, all belts, clutch master cylinder, and other essentials. Has a full length header and new exhaust. 17 inch alloy wheels in serviceable condition. Interior stripped and cleaned except dash, console, and seat. Fiberglass front bumper/spoiler. New 5-point harness.

Give me a call and make me an offer!

Mark Reese
