

## list videos with 944 Spec first

Posted by tcomeau - 26 Nov 2012 19:52

---

Hey guys,

To make searching/finding all our videos easier, Please make the first words of the title say, "944 Spec". Not Buttonwillow, or Hastings ,or other things first. This is good marketing for the class as well.

For example....."944 Spec at California Speedway, March 2012."

The class thanks you.

Most of mine said "NASA 944 SPEC...."

Changing 'em all to "944 SPEC..." - good idea Tim!

Thanks, man. I think it will increase overall awareness of the class as well if people keep doing searches for 944 and our videos pop up.

Bored on a Friday? Need something to do to kill some time? Got Youtube racing videos?

Go to youtube and get to your Video Manager. See your list of videos? See the edit button? Click on it. Then click on Enhancements at the top. Click on Stabalize on the left, then click Save.

This YouTubes built in Video Stabilizer. It works well, and costs you nothing. No more shakey videos. It's

not instant... it takes a little while for the YouTube servers to process your video.

I just retitled all of my videos and added my region information as well. Now when you search for 944 spec Texas, nearly all of my videos show up on page 1.
